

I strongly support Cap Tel telephones for the hard of hearing. As a hearing impaired individual, this form of telephone communication would greatly assist in my daily life as well as in employment. CapTel is the type of phone communication that I have greatly longed for due to the difficulty and expense of trying to use two-line VCO relay systems. Please support CapTel with great urgency! I urge you to please help in bettering the lives of over 28 million hard of hearing individuals in U.S. For the benefits of CapTel can make communication easier for not only the hearing impaired yet for the hearing parties as well.

Thank you!

Sincerely,

Cynthia Klein
